Why Wedding Stationery?

A short story, by me.

From printing delays to professional trimming of my graphics in a shopping centre at 10pm the night before the day I said "I DO!" I went through it all... Not to mention the prices everyone was trying to charge me for rather low-effort templates with our names stamped on.

So, I decided to do it all myself. I took on all the pressures, the critiques from my now wife, reworks on redesigns and 2am inspiration wake-ups that had me running for my sketchpads and notebooks.

(Sorry my now wife!) 💕

The result was the perfect, bespoke and beautiful designs that perfectly fit the aesthetic of our special day. I ROCKED IT! It. Was. PERFECT!

And so, after planning and designing all of my own wedding stationery I now understand everything that could go wrong! I created a way to make sure I can offer every design a couple could need on their day and married them to fair prices. I had a big problem with prices for services being so high due to the word "wedding", and I'm sure you do too!

In this document you'll find all of my available services, pricing, a great package deal to help you save the most, and finally, a wonderful timeline to help you plan the best day possible (carefully curated by me!)
